Introduction and goals

I think development is amazing thing in the world and I'm happy to spend a lot of time for the new knowledge in the industry. I began professional programming since 2012. Earlier I worked professionally marketing, professional education but had always wanted to work in the sphere of technology. And from the time that my dream came true and I developed my first web project I am constantly studying programming, attend conferences and communicate in IT communities. At certain times I realized prospect Javascript and began to specialize in this programming language and JavaScript libraries.

That's why I want to expand my capabilities in Javascript development and to get a job outside of Ukraine. My goals are to work in IT companies in Western Europe or the United States. I am also considering the possibility work in Kiev. Happy to consider your suggestions.

My knowledge

Development

I specialize in web development and basically programming in JavaScript. I have practical experience in the development of large applications in accordance with the basic design patterns of programming. In addition I am familiar with the development on PHP and Ruby on Rails.

Front-end

Basically, I develop "Single page applications" on Angular JavaScript library. Mostly in ES5, ES6 or CoffeeScript. Have experience in working with these Js libraries as Lodash, jQuery, PrototypeJs, Q.JS, React. HTML: Jade, Slim. CSS: SCSS, Bourbon, Neat

Back-end

In particular, I develop on Server JavaScript with NodeJs and frameworks like KoaJs or ExpressJs. Earlier had experience in PHP back-end development. I worked c CMS Magento and develop custom extensions for e-commerce projects. Magento based on Zend framework

Databases

Lately actively developing knowledge in working with databases such as MongoDB and RethinkDB. Also I familiar with MySQL and FireBase, but the database is not my specialization.

My experience

SmartCS - AngularJs Developer

I have participated in the front-end development of large-scale online service to conduct business enterprise accounting, inventory accounting and document circulation in Ukraine and Russia. Over 10,000 lines of code has been written on AngularJs. Technology basic stack: Es5, CoffeeScript, Gulp, Bourbon. KarmaJs and Jasmine for testing.

Emaster - PHP Developer

- Creating an online store based on Magento from scratch to deployment.
- Create of templates(Html, Css, Xml, Javascript). Implementation of templates in Magento.
- Module Development (PHP), integration 3rd party modules.
- Optimization server performance under Magento.

Other experience

Languages: English, Russian
Courses & education: JavaScripts courses; Fundamentals of magento development; PSTU - Master degree;
Additional skills: Communication, project management, presentation skills.
